SERVICE MANUAL The calibrations by Bosch meet the requirements according to ISO 9000ff, and the results are documented in a certificate. Please follow the collections procedure for service and repair, noting that the product is for calibration. Recently Bosch has become a major player in the laser level industry after purchasing Robo Toolz a few years back. In this guide I am going to look at the calibration procedure for 4 of Bosch's rotating laser levels. The Bosch GRL 250 HV, GRL 300 HV and GRL 300 HVG green beam, all these models share the same calibration procedure.
