The Mechatronic Engineering Laboratory has nine workbenches that each have state-of-the-art electronic test and measurement equipment (oscilloscope, function generator, multimeter, and power supply), a personal computer, and a printer. Mechatronics is the combination of Mechanical engineering, Electronic engineering, Computer engineering, software engineering, Control engineering and Systems Design engineering in order to design and manufacture useful products. Mechatronics is a multi disciplinary field of engineering, that is to say it rejects
