Same thing happened with me. I have an Apple TV 4K, the VSX-932 and my old Samsung LN46C630. Wife and I were watching TV, finished and I turned off using the VSX remote, TV went off, VSX went off. I am noticing the flicker quite a bit in various menus with solid gray or gray-like colors on Xbox. BFI is definitely disabled, as enabling Motion Pro creates a far more pronounced flicker across the whole screen, so it seems to be a separate issue.
