Sentaurus Process is part of a comprehensive suite of core TCAD products for multi-dimensional process, device, and system simulations, embedded into a powerful user interface. Sentaurus is a suite of TCAD tools which simulates the fabrication, operation and reliability of semiconductor devices. The Sentaurus simulators use physical models to represent the wafer fabrication steps and device operation, thereby allowing the exploration and optimization of new semiconductor devices. About this manual Sentaurus Process. Sentaurus Process is an advanced 1D, 2D, and 3D process simulator suitable for silicon and semiconductor semiconductors. It features a modern software architecture and state-of-the-art models to address current and future process technologies.
