The Liberator is a physibible, 3D-printable single shot handgun, the first such printable firearm design made widely available online. The open source firm Defense Distributed designed the gun and released the plans on the Internet on May 6, 2013. The plans were downloaded over 100,000 times in the two days before the United States Department of State demanded that Defense Distributed retract ...The World's First Entirely 3D Printed Gun. If you think that piece of plastic above is just a toy, you'd be wrong. It's an actual... Read more ReadThe term 3D printing covers a variety of processes in which material is joined or solidified under computer control to create a three-dimensional object, with material being added together (such as liquid molecules or powder grains being fused together), typically layer by layer. In the 1990s, 3D printing techniques were considered suitable only for the production of functional or aesthetical ...No less disturbing are the copious pronouncements of Gyeorgos Ceres Hatonn, a feisty ET who has not hesitated to finger the “Zionists” and “Khazars” as the arch-villains in the earth’s present crises.<sup>8</sup> Hatonn, reputedly a nine-and-half-foot-tall reptilian ET, even persuaded his human supporters to reprint the infamous Protocols of the Elders of Zion in their newspaper the Phoenix ...
